Conceptual Model

Conceptual board depicts the theme of our app. There are different pictures which are depicting how covid affected the lives of people and many other different things like navigation or social connections which users can easily understand.

3. Manager
4. Supervisor
5. Professor

6. Connections

1.
Sam is checking his weekly schedule and is adding other important events like doctor's appointment.

2.
Deadline
Sam gets a notification on his phone about an upcoming deadline and starts to work on it

3.
Gym
Sam recieves another notification about time to leave for gym. The app searches for the cheapest and fastest route.

4.
Dinner   Movie night
Games
Sam is checking his schedule to choose the best time to catchup with his friends for dinner and a movie. Then the app updates his schedule with a hangout tag.

5.
work   school
Sam is syncing both his school and work schedule, to get timely notifications about the upcoming tasks and deadlines.

This is the Lo-fi Prototype made from the common ideas how the app will work and how the user can perform and add different things to make their complicated life easy and simple. It also shows the basic features and pages which would be included in the app.

Wireframes

These 3 frames of wireframes show us one of the features of our app which is schedule and how it works. In the schedule feature the person can put up their schedule from either school, work or both by manually or through syncing in the school or work account which would be helpful for students to easily have their important deadlines by notifications or find out their free times from their schedule.
