Volere Requirement Template

Requirement No.: 1	Requirement Type: 9	Use Cases: 5

Description: The product will notify the user if the GPS signal is not available

Rationale: If the user has a planned trip ahead in the schedule and the navigation is either turned off or the GPS signal is weak, the user will be notified via SMS.

Source: Testing user

Fit Criterion: While scheduling the week, the product shall estimate the time for travel required by the user Therefore, the location services are required

Customer Satisfaction Rating: 4	Customer Dissatisfaction Rating: 2
Dependencies: Task scheduler plans travel ahead accordingly for the user's schedule	**Conflicts:** None
History: Raised during testing	**Supporting Materials:** Google or Apple location services

Volere Requirement Template

Requirement No.: 2	Requirement Type: 14	Use Cases: 7

Description: The product shall notify the user for account permissions (student or work calenders) to work with other applications

Rationale: Issues with syncing the schedule with calenders will show that the user has not provided enough permissions, the scheduled week might not work and the user has to manually input all the entries.

Source: Users (School Students)

Fit Criterion: If the user requires to sync the schedule with external applications, the product should open up the required application as requested by the user.

Customer Satisfaction Rating: 4	Customer Dissatisfaction Rating: 3
Dependencies: None	**Conflicts:** None
History: Raised during testing by school students	**Supporting Materials:** Outlook, Moodle or Google Calender
